Is the contamination petroleum related: No

Section 2: Operational History

Current owner: Roto Metals/Gary Hora

Current operator: Pirates Press

Hazardous materials used: Not known

Dates of operation: 3/2007 to present

The site is now occupied by a business named Pirates Press. Pirates Press is a collector and a manufacturer of vinyl records. This location appears to be a retail sales office. Roto Metals operated the site from July 1985 to March 2007. The Rotor Metals web site states that the company is a family owned business and was founded in 1939. It appears that Roto Metals has moved to San Leandro, California. Roto Metals specializes in a wide variety of alloys and anodes and manufactures specialized zinc products.

Historical owners/operators that may have used Hazardous Materials onsite:
Specify dates and materials that may have been used:

Owners: Roto Metals /Gary Hora

Operators: Roto Metals

Hazardous materials used: Lead acetate, zinc chloride, ammonium chloride, zinc ammonium chloride, propane, zinc flux liquid, paint and thinner

Hazardous materials suspected: None

Dates of operation: 7/17/1985 to 3/3/2007

Section 3: Site Impact Information

What is the site setting: Commercial and residential

Details: The site address is 980 Harrison Street and is located on the northwest side of the street. The site is also identified by the San Francisco County Assessors Parcel Number 3753-027. The site is about 0.05 acre of land and appears to be a two-story building. Immediately to the northeast and northwest (behind the site) of the site are mainly residential homes, to the southwest and southeast are mixed-use areas of commercial and residential.

Land use surrounding the site: Light industrial, commercial and residential

Details: Immediately adjacent to the site (northeast and southwest) are residential homes. A tire retail store (Roberts Tire) is located southwest of the site. Across Harrison Street are mainly commercial businesses and light industrial operations such as Venetian Natural Marble and a muffler repair shop. Northwest of the site are mainly residential homes.

Are there residences within 200 feet: Yes

Details: Immediately adjacent to the site (northeast and southwest) are residential homes. A residential motel named Bay Bridge Inn is located about 200 feet northeast of the site

Are there schools/day care centers within 200 feet: No
Details:

Surface water within 2 miles of the site? Yes
Details: The site is about one mile west of the San Francisco Bay.

Are there any sensitive environments or wetlands within 2 miles of site: No
Details: Any sensitive environments would be associated with the San Francisco Bay.

Is this site a source of contamination to surface water? No
Details: The site is not listed on the Geotracker data base.

Is surface water used for drinking water within 15 miles of the site? No

If yes, is the surface water used for public / commercial supply:

If yes, is the surface water used for private supply:

If yes, approximately how many people served by the surface water:

Details:

Is groundwater used for drinking water within 4 miles of site? Yes

If yes, are the drinking wells public / commercial: Yes **or private:** No

If yes approximately how many people served by the ground water: 92311

Details: According to the information on the Envirostor data base, there is a system of public wells owned by the City of Daly City within 4 miles radius of the site. These public wells supply drinking water to a population of 92311 people.

Is groundwater within 4 miles of the site known to be contaminated with hazardous substances: No

There are many leaking underground fuel tanks located within four miles radius of the site as shown by the Geotracker data base. The shallow groundwater appears to have been impacted by gasoline and diesel. It is not known if the deeper groundwater that may be used as a water drinking source has been impacted. The public wells mentioned above have not been impacted by gasoline or diesel.

If yes, what hazardous substances :

If yes, do any of the levels exceed drinking water standards?

Details:

Is this site a source of ground water contamination? No

Details:

The Site Screening Assessment (SSA) is used for preliminary data gathering and planning purposes. All findings and recommendations are subject to change if new information necessitating further consideration is discovered.

Any Community Involvement? Not known
Details:

Site Reconnaissance

1. **Date of visit:** 10/27/2008
2. **Adjacent properties:**
 - North** Residential homes
 - South** Residential homes and a tire retail store
 - East** Harrison Street to the east and across the street are a car muffler repair shop and a retail marble store
 - West** Residential homes
3. **Structures onsite (e.g. Office Bldg, Paint Booth, Repair Shop etc.):** The doors were closed. The site is a 2-story building and is now occupied by a vinyl record company called Pirates Press.
4. **Any visual staining:** There were no stains on the side-walk and no obvious stains on the entrance to the site.
5. **Any hazardous Materials storage onsite:** Not observed because the site was closed.
6. **Specify any hazardous Materials used onsite:** Not observed because the site was closed.
7. **Indicate if following are present onsite, specify volume, content and how many:**
 - a) **Drums:** Not observed
 - b) **ASTs:** not observed
 - c) **USTs:** Not observed
 - d) **Clarifiers:** Not observed
 - d) **Other:** None
8. **Any transformers containing PCBs?** No
9. **Any previous sampling results:** No

Section 4: Recommendations/Conclusions

Does the site pose an immediate threat and require Removal? No

Have there been any historical releases at the site: None documented

Based on the site reconnaissance and/or regulatory search is there a potential for a release at the site? No.

The site is not listed on the Geotracker data base. During the site visit, there was no obvious stain on the sidewalk in front of the site. No obvious stain was observed at or near the front door where the shipping and receiving were located.

On November 21, 2008, the County of San Francisco HMUPA inspected the site and found that no hazardous substances were present at the site and has determined that the site is not regulated under HMUPA.

Summary

Roto Metals was located at 980 Harrison Street in San Francisco. According to the Choicepoint data base, Roto Metals started its business at this location in 1985 as a business specialized in manufacturing specialty metals. According to its web site, Roto Metals is a family owned business and was founded in 1939. Roto Metals moved from San Francisco to San Leandro in March 2007. The current business at this location is now occupied by a company called Pirates Press. Pirates Press is involved in the collection and manufacturing of vinyl records.

The San Francisco Fire Department records show that the Roto Metals was inspected on 6/28/2004 and 3/22/2007. Both inspections did not show any violations. Roto Metals had a permit for liquefied petroleum gas portable cylinders. During the 3/3/2007 inspection, the San Francisco Fire Department states that the company was out of business at the Harrison Street location.

The San Francisco Department of Public Health Environmental Health Management record shows that Roto Metals used hazardous materials such as lead acetate, zinc chloride, ammonium chloride, zinc ammonium chloride, propane, zinc flux liquid, paint and thinner. Roto Metals was not a generator of hazardous waste but only stored and used hazardous materials. Roto Metals was inspected in 1995, 1998, 2001 and 2005 by the San Francisco Department of Public Health, Hazardous Materials Unified Program Agency (HMUPA). The 1995, 1998 and 2001 inspections found violations of hazardous materials regulations including labeling, eyewash station, disposition of empty drums, and inadequate spill cleanup equipment. The 2005 inspection did not find any violations. On May 13, 2007 Roto Metals informed the Department of Public Health Environmental Health Management that it is no longer conducting business in San Francisco.

On the date of the drive-by visit, Pirates Press was the operator at the site. The front door was not open for business. As Roto Metals is no longer operating at this location, it is recommended that no further action is required at the site for the following reasons:

1. The site used hazardous materials, which were consumed during the manufacturing process. No spills or releases have been documented by the San Francisco Fire Department or by the HMUPA. The site did not generate hazardous waste as documented by the HMUPA.
2. The site has been regulated and inspected by the San Francisco County HMUPA and the San Francisco Fire Department. On November 21, 2008, the HMUPA conducted a final inspection and found that no hazardous substances were stored at the site. HMUPA has determined that the site is no longer regulated by the HMUPA.
3. Roto Metals, the previous operator who used hazardous materials has moved to a new location.
4. The site is not listed on the Geotracker data base.

REQUEST TO SEARCH PUBLIC RECORDS

Maintained By

Maintained By
THE HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY (HMUPA)

The copying fee is \$.10 per copy payable by **Check Only**. Requesters may also choose to employ a copying company or bring in their own copy machine.

Please provide the following information and note that file review appointments will be set up as requests are received. Once given an appointment, please arrive on time as a courtesy to other people who have requested and waited to research files. Not arriving on time may cause you to loose the appointment you were given. Other arrangements may be made if for any reason, you can not keep your appointment. If you wish to cancel or re-schedule an appointment, please call the File Search Coordinator at 252-3843.

During your file review appointment you will be asked to lock your personal belongings in a cabinet that is adjacent to the file review desk. Please note that the official Department of Public Health record retention policy is five years unless otherwise stipulated by law. Records older than five years may not be available for review.

may not be available for review.

INSTRUCTIONS FOR THIS FORM

Please review the information on file with the Department of Public Health about your business in statements 1 through 6 below. Then for each statement, indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column. For each check (✓) in the NO column, you must submit additional information on the form indicated in the far right hand column. For specific instructions, refer to the appropriately numbered **INSTRUCTION / FEE SCHEDULE** as indicated in the first column. The enclosed invoice reflects fees in accordance with the information indicated below. If the fee amount you submit to the Department of Public Health is different than the amount indicated on the invoice, you must complete and submit a **FEE CALCULATION FORM**, with your renewal application.

INSTRUCTIONS FOR THIS FORM

Please review the information on file with the Department of Public Health about your business in statements 1 through 6 below. Then for each statement, indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column. For each check (✓) in the NO column, you must submit additional information on the form indicated in the far right hand column. For specific instructions, refer to the appropriately numbered INSTRUCTION / FEE SCHEDULE as indicated in the first column. The enclosed invoice reflects fees in accordance with the information indicated below. If the fee amount you submit to the Department of Public Health is different then the amount indicated on the invoice, you must complete and submit a FEE CALCULATION FORM, with your renewal application.

Sample Emergency Response Plan
(Instructions Begin on Page 61)

5500

45 DAY DUE DATE
10/13/92ROTO METALS
930 HARRISON ST
SAN FRANCISCO CA 94107

This business will operate and maintain its facility in a way that reduces the possibility of accidents. To achieve this goal, every employee shall become familiar with the proper use, storage, and handling of hazardous materials and shall follow appropriate work practices.

In the event of an accident, employees will follow the procedures outlined in this plan.

I. Emergency Coordinator

The Emergency Coordinator is responsible for coordinating all emergency response actions at the facility. He/she is familiar with the operations of the business and has full access to the facility. In addition, he/she has the authority to make decisions during an emergency and will be available on a 24-hour basis. The Alternate will work in conjunction with the Emergency Coordinator or on his/her behalf.

Emergency Coordinator: _____

GARY M. HERRA

(Name)

President

(Title)

Alternate Coordinator: _____

Stella Kilpatrick

(Name)

Hazardous Waste Hauler/Emergency Clean-up Contractor

N.H. Environmental Services
(Contractor)543-4835
(24-Hour Phone)

The law requires the business owner to make oral and written reports of hazardous materials spills and leaks.

After an uncontrolled spill or leak of a hazardous material, GARY M. HORA (Name a person, or a position within the business) will be responsible for calling the following agencies:

S. F. Department of Public Health
California Office of Emergency Services
National Response Center

554-2775
1-800-852-7550
1-800-424-8802

In addition to calling the agencies listed above:

- Whenever spilled hazardous materials enter into the sewer, GARY M. HORA (Name a person, or a position within the business) will be responsible for calling:

S. F. Department of Public Works

695-2020

- Within 15 days of a hazardous waste spill, a written report will be provided by GARY M. HORA (Name a person, or a position within the business) to:

Toxics Substance Control Division
700 Heinz St., Berkeley, CA 94704

1-800-852-7550

- Within 24 hours of an underground tank leak, notify the S.F. Health Department and within 5 days, a written report will be provided by GARY M. HORA (Name a person, or a position within the business) to:

S. F. Department of Public Health, Bureau of Toxics, Health, and Safety Services
101 Grove St., #220, S.F., CA 94102

554-2775

- Other governmental agencies that might need to be notified:

Bay Area Air Quality Management District
California Fish and Game
California Highway Patrol

1-800-792-0836
707-944-5512
707-648-5550

744-2000
476-6600
510-437-3073

Caltrans
Environmental Protection Agency
Poison Control Center
U.S. Coast Guard

(You may wish to make a copy of this page and post it by the phones.)

III. Pre-Emergency Contacts With Emergency Services

GARY M. HARRIS (Name a person, or a position within the business) will be responsible for inviting the firefighters at Fire Station # 1 (Identify the fire station closest to your business facility) to visit the facility as often as is needed to become familiar with its operations and hazardous materials. 415 Jessie ST

GARY M. HARRIS (Name a person, or a position within the business) will be responsible for notifying the hospital (listed in Section II of this plan) as often as is needed of any special medicine, equipment, or decontamination procedures that will be required to treat injuries and illnesses caused by the hazardous materials used at this business.

Spilled hazardous materials and dirty absorbents may be considered hazardous waste. Hazardous waste cannot be thrown out with regular trash. It must be removed by a licensed hazardous waste contractor. GARY M. HARRIS (Name a person or a position within the business) will contact the hazardous waste contractor listed in Section II of this plan to remove hazardous waste produced as a result of a spill or leak.

IV. Method of Alerting Employees and Other People Within The Facility

When there is an emergency, employees and other people within the facility will be alerted by: (Describe alarms. Alarms may be vocal or mechanical but should be adequate to notify any area of the business. If available, describe location of mechanical alarms and how they work. Describe how unaccompanied visitors will be informed of the business' emergency alarm system.)

Each other small building (vocal)

V. Method of Alerting Neighbors

In the event of a spill/ leak of a hazardous material, or fire, immediate neighbors who may be affected include: (Use additional sheets of paper if necessary.)

Flat 978 HARRISON ST

(Address)

Flat 984 HARRISON ST

(Address)

(Address)

(Address)

(Address)

(Address)

(Address)

(Address)

(Address)

When a hazardous material accident may affect these neighbors, employees will alert them by: *(List the employees who will be responsible for contacting them and describe how they will be contacted.)*

1. GARY M. HERR

VI. Procedures For Shutting Off Gas, Electricity, and Water

(List the situations when the gas, electricity, and water should be shut off. Who will be responsible? Describe the "ON" and "OFF" positions of the switches and valves. List any tools that need to be used to turn "ON" and "OFF" the switches. When can the utilities be turned on again? Include tools that may be needed.)

1. GARY M. HERR

VII. Evacuation Procedures

(Outline the procedure your business will follow to immediately evacuate the people within your facility in the event of an emergency. You are required to prepare and post evacuation maps, but they do not need to be included here. List the pre-arranged locations outside of the business where employees should meet. Identify person(s) responsible for accounting for all employees and others. Use additional sheets of paper if necessary.)

1. only two exits Front door
OR Roll up shipping & Receiving door

During an evacuation, will there be any employees who will have to stay behind in the building to operate critical plant operations before they evacuate? If so, who will stay? What are the responsibilities and procedures for these employees?

VIII. Procedures For Rescues and Other Medical Duties

(List the steps employees should take when rescues and other medical assistance are necessary. Note that first aid and CPR should be performed only by trained individuals. Consult Material Safety Data Sheets for more information on completing this section.)

1. Call 911

IX. Process Description

Listed below is a description of activities or processes in which hazardous materials are used: (Attach additional pages if necessary.)

Process	Hazardous Materials Used	Possible Emergencies (Spills, leaks, etc.)
---------	--------------------------	---

melting

Lead

burn

Process

Hazardous Materials Used

Possible Emergencies
(Spills, leaks, etc.)

X. Identification of Hazardous Materials With Similar Clean Up Procedures

(Since different hazardous materials have different properties and present different hazards, all spilled materials cannot be cleaned up the same way. Different personal protective and spill control equipment and precautions may be needed. Separate procedures will need to be prepared for responding to the spills and leaks of the different categories of hazardous materials.)

To identify the various categories of hazardous materials, review the Material Safety Data Sheets for the products in your inventory. Determine which materials can be spilled or leaked and would pose a risk to the environment. A product in an aerosol can cannot be spilled and would not require a spill response procedure. Group together those materials that can be spilled or leaked and can be cleaned up in a similar fashion. For example, a spill of motor oil, hydraulic oil, and antifreeze will present similar hazards to employees, the public, and the environment and can be cleaned up in a similar way. These three products can be grouped together and one spill response procedure can be prepared.

Here are some categories of materials you may have: water reactive solids, flammable compressed gases, nonflammable compressed gases, flammable solvents, nonflammable solvents, acids, and oxidizers.

Finally, list the categories that you have identified below.)

Category of Material

Typical Products Included in Category

Zinc Chloride	
inorganic salts	Zinc Chloride
	Ammonium chloride
	Zinc Ammonium chloride

(Use the above list in completing Section XII of this plan. Prepare a spill/leak response procedure for each of the categories. Make as many copies of the worksheet on page xxx (Section XII--Procedures For Controlling and Cleaning Up Spills and Leaks) as there are categories listed above.)

XI. Procedures For Responding To A Major Spill Or Leak

(When should employees call for help, such as calling 911 or an in-house emergency response team, and not try to clean up a spill or leak by themselves? Some factors to consider include: the toxicity of the materials, the amount of material spilled, the location of the spilled material, the potential to harm the public, the availability of equipment to respond to the spill, etc. Consult the Material Safety Data Sheets for more information. List those situations.)

Employees should call for help and not clean up a spill by themselves when:

1. The employees have not been trained to clean up the spilled material.

sweep up material & place into
SIDER in plastic drums

When the above situations occur, employees should call for help by: (List the steps that employees can take to respond to a spill and leak.)

1. Notify Gary Horn & proceed
as above

XII. Procedures For Controlling and Cleaning Up Spills and Leaks

(Describe what employees should do to control, contain, and clean up a hazardous material spill or leak. Complete one of these worksheets for each category of hazardous material listed in Section X. See example on page 62. Make more copies of this worksheet if necessary.)

Category of Material: INORGANIC SALTS
 Typical Products: Zinc Chloride Ammonium chloride
Zinc Ammonium Chloride
 Special Precautions: _____

1. Put on protective equipment:
 - a. Rubber Glove
 - b. eye protection
 - c. _____
2. Obtain spill control equipment:
 - a. shovel, broom, gloves
 - b. _____
 - c. _____
3. Control procedure: (Describe what should be done to stop, confine, and remove the hazard.)
 - a. sweep & put back into 8 liter containers
4. Decontamination procedure: (Describe what should be done to clean-up the contaminated area, equipment, and personnel.)
 - a. N/A
5. Disposal procedure: (Describe how dirty absorbent and other contaminated equipment should be disposed.)
 - a. N/A

Make more copies of this worksheet if necessary.

XIII. Procedures For Responding To A Fire Involving Hazardous Materials

(List the steps employees should take when there is a fire involving hazardous materials. Fires involving hazardous materials may produce special health or physical hazards. Include any special precautions in this section. Consult Material Safety Data Sheets for more information. Regardless of the size or nature of a fire, the S.F. Fire Department requires businesses to call 911.)

1. The person who discovers the fire will call or direct someone else to call 911.

leave the building call 911

XIV. Procedures For Responding To An Underground Tank Leak (if applicable)

1. If there is immediate danger of fire, injuries, or property damage, call 911.
2. Within 24 hours of discovering the leak, report the leak to the S. F. Department of Public Health. If there is an emergency, such as the possibility of a fire or gross pollution of surface or underground water, then call immediately the State Office of Emergency Services (1-800-852-7550) or the S. F. Bay Regional Water Quality Control Board (510-464-1255).
3. Investigate where the leak is.
4. Stop the leak. It may involve immediately removing the hazardous material from the tank. Clean up small spills, if possible.
5. Within 5 days of the leak, submit the Underground Storage Tank Unauthorized Release/Contamination Site Report. (The report form is available at the Health Department at 101 Grove Street #220.)

XV. Procedures For Responding To An Earthquake

The safest locations in the building during an earthquake are:

out side

The areas that are most easily damaged during an earthquake and must be inspected or isolated immediately after an earthquake are:

XVI. Emergency Response Equipment

(List the emergency response equipment available at your facility. For example, fire extinguishing systems, spill control equipment, decontamination equipment. Describe the testing and inspection schedules for this equipment. Who is responsible for ensuring that the equipment is regularly tested and inspected? Equipment should be on hand to contain and cleanup any possible spills or leaks. Information in the "Spills and Leaks" section of the Material Safety Data Sheets will indicate types of equipment needed. Use additional sheets of paper if necessary.)

<u>Equipment</u>	<u>Location</u>	<u>Testing Schedule</u>	<u>Inspection Schedule</u>
• Absorbent	in each shop	not applicable	check daily
• Fire extinguisher ✓	in each shop ✓	annually ✓	check monthly
•			
•			
•			

Person Responsible: GARY M HERR

XVII. Review and Update

GARY M HERR (Name a person or a position) will be responsible for reviewing and updating the emergency response plan at least once per year. If necessary, the plan will be revised more frequently. Substantial changes made to the plan will be reported to the S.F. Department of Public Health.

BUSINESS ACTIVITIES DECLARATION FORM

(For Previously Registered Businesses)

This form is required for all renewal applications.

Facility ID # 5600	(Complete this box or affix label here) Due Date 10/15/01
Business Name ROTO METALS	
Street Address 980 Harrison ST	
San Francisco, CA	Zip Code 94107

INSTRUCTIONS FOR THIS FORM

Please review the information on file with the Department of Public Health about your business in statements 1 through 6 below. Then for each statement, indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column. For each check (✓) in the NO column, you must submit additional information on the form indicated in the far right hand column. For specific instructions, refer to the appropriately numbered INSTRUCTION / FEE SCHEDULE as indicated in the first column. The enclosed invoice reflects fees in accordance with the information indicated below. If the fee amount you submit to the Department of Public Health is different than the amount indicated on the invoice, you must complete and submit a FEE CALCULATION FORM, with your renewal application.

INSTRUCTION/FEE SCHEDULE

P

		YES	NO	If you checked NO indicate the correct amount or information:	If you checked NO you must submit.....

This inspection report identifies violations of federal, state or local laws and regulations governing hazardous materials storage facilities. A checkmark indicates a violation of the indicated laws and regulations. The applicable laws and regulations are found in the Health and Safety Code (HSC), Division 20, Chapter 6.5, 6.75 and 6.95, Title 22 and 27 of the California Code of Regulations (CCR), Division 4.5, and the San Francisco Fire Code (SFFC) Article 21, 21A and 22 of the San Francisco Health and Safety Code (SFHC) are the implementing ordinances.

Administrative Violations

<input type="checkbox"/> HM.A1	A complete application or renewal application for HMUPA Compliance was not submitted. The Certificate of Registration is not transferable to another owner, address or physical location within the same address. [SFHC 1110.1, 1115, 1176] <i>Submit a complete application and all applicable fees by the pocket due date.</i>
<input checked="" type="checkbox"/> HM.A2	Required hazardous materials management programs and records were not found on site. [SFHC 1110.1(d)(e)(h), 1161(a), 1162; SFFC 8001.3.2, 8001.6; CCR 66265.16, 66265.74] <i>Keep on site accurate Hazardous Materials Reduction Plan, Emergency Response Plan, Material Safety Data Sheets, training records, and self-inspection records. Keep log records + quarterly self inspection on site.</i>
<input checked="" type="checkbox"/> HM.A3	HMUPA Compliance Certificate was not posted. [SFHC 1114(c)] <i>Post a copy of the Certificate of Registration in a location open to public access at all times. Post most recent copy of CCR.</i>
<input type="checkbox"/> HM.A4	Facility map was inadequate. [SFHC 1110.1(f); SFFC 8001.3.2] <i>Submit an amended facility map which includes at a minimum the following: hazardous materials/regulated substances/underground storage tank locations, utilities shutoffs, emergency shutoff for underground storage tanks, north direction arrow, front direction of site, and other applicable emergency response information. See Application to Store Hazardous Materials for appropriate symbols.</i>
<input checked="" type="checkbox"/> HM.A5	Chemical Inventory Reporting Form was incomplete. [SFHC 1110.1(b); SFFC 8001.3.3] <i>Submit a complete inventory of all hazardous materials stored over the reporting thresholds. Provide separate inventory forms for each room in which hazardous materials are stored. Update HazMat Inventory.</i>

HM-1

BUSINESS NUMBER

INSPECTOR NUMBER

HM.A6

Emergency Response/Contingency Plan for the site was inadequate. [SFHC 1110.1(c); SFFC 8001.5, 8001.9; CCR 66262.34(a)(3), 66265 Article 4]
Submit an amended plan which at a minimum includes the following: immediate notification to appropriate local emergency personnel; procedures for managing a release or threatened release to minimize any potential harm or damage to persons, property or the environment; evacuation plans and procedures, including immediate notice, for the business site and for the affected public; information on the availability, testing, and maintenance of emergency equipment.

General Storage Requirements

HM.B1

Incompatible materials were not stored in a manner which will prevent accidental mixing. [SFHC 1116; SFFC 8001.9.8; CCR 66262.34(a)(1)(A), 66265.177, 66265.199]
Separate or isolate materials which in combination with other substances may cause a fire or explosion or may liberate a flammable or poisonous gas. Separation can be achieved by: 1) Separating the storage of the incompatible hazardous materials by a distance of greater than 20 feet; 2) Isolate the storage of the incompatible materials by a non-combustible partition extending greater than 18 inches above and to the sides of the material; or 3) Store the incompatible materials in different storage cabinets.

HM.B2

Shelves on which hazardous materials were stored were not of substantial construction and/or were not adequately braced or anchored. Lips or guards were not present on shelving when used for the storage of individual containers [SFHC 1116; SFFC 8003.1.4]
Provide shelves with substantial construction and/or braces or anchors for storage of hazardous materials. Provide shelves with a lip or guard when used for the storage of individual containers.

HM.B3

Access to electrical control panels was inadequate. [SFHC 1116; SFFC 8509.2]
Provide a minimum clearance width of 30 inches and a minimum height of 78 inches.

HM.B4

Fire extinguishers were improperly managed. [SFHC 1116; SFFC 1002]
Install, mount, and maintain on an annual basis all portable fire extinguishers.

HM.B5

Exits were obstructed. [SFHC 1116; SFFC 1203]
Remove all obstructions, including storage, from the required width of exits. Exits shall not be obstructed in any manner.

HM.B6

In storage areas serving employees only, the minimum aisle width of 24 inches was not maintained. [SFHC 1116; SFFC 1204.2.2]
Maintain a minimum aisle width of 24 inches in storage areas serving employees only.

Labeling/Signage

HM.C1

Hazardous and recyclable materials storage containers were not properly labeled. [SFHC 1117; SFFC 8001.7]
Label each container of hazardous materials with the identity of the hazardous materials and appropriate hazard warnings.

BUSINESS NUMBER

INSPECTOR NUMBER

<input type="checkbox"/> HM.C2	Hazardous waste storage containers were not properly labeled. [SFHC 1117; SFHC 8001.7; CCR 66262.31, 66262.34(f)] <i>Label each container of hazardous waste with the following: 1) The words "HAZARDOUS WASTE", 2) Composition and physical state, 3) Hazard property, 4) Name and address of generator, 5) Accumulation start date.</i>
<input type="checkbox"/> HM.C3	Hazard identification signs were inadequate. [SFHC 1116; SFHC 8001.7] <i>Provide appropriate hazard warning signs and/or post National Fire Protection Association's Identification System - Fire Hazards of Materials (NFPA 704 symbol). Use blank squares for mixed chemical storage and hazard numbers for a single hazardous material.</i>
<input type="checkbox"/> HM.C4	Doors to electrical control panel rooms were unmarked. [SFHC 1116; SFHC 8509.3] <i>Mark entrances with a plainly visible and legible sign stating "ELECTRICAL ROOM" or similar pre-approved wording.</i>
Container Storage	
<input type="checkbox"/> HM.D1	Hazardous materials/waste containers were defective, corroded, leaking, deteriorated, and/or bulging. [SFHC 1116; SFHC 7901.7.3, 8001.4.7.3; CCR 66262.34(a)(1)(A), 66265.171] <i>Repair or dispose of defective containers in an approved manner.</i>
<input type="checkbox"/> HM.D2	Hazardous material/waste was stored in a container not compatible or approved for the use intended. [SFHC 1116; SFHC 8001.4.4; CCR 6626.34(a)(1)(A), 66265.172, 66262.30; 49 CFR 173.34] <i>Transfer incompatible hazardous material/waste to a container approved for the use intended.</i>
<input type="checkbox"/> HM.D3	Empty hazardous materials storage containers were improperly stored. Empty containers previously used for storage of hazardous materials must be free from residual material or vapor or must be maintained as specified for the storage of the hazardous material. [SFHC 1116; SFHC 7902.5.3, 8001.4.6] <i>Label all empty containers as "EMPTY" or store in an area labeled "EMPTY DRUMS".</i>
<input type="checkbox"/> HM.D4	Hazardous materials/waste containers were (a) left open when not in use or (b) container was used or stored in a manner which may rupture the container or cause it to leak. [SFHC 1116; SFHC 8001.10.1; CCR 66262.34(a)(1)(A), 66265.173] <i>Caps, bungs, or other sealing devices shall be in place on hazardous materials/waste containers whenever possible. Store hazardous materials/waste containers in a manner which would prevent spills.</i>

HM-3

BUSINESS NUMBER

INSPECTOR NUMBER

Storage of Flammables/Combustibles

- ☐ HM.E1 Flammable liquids containers were improperly stacked and stored. [SFHC 1116; SFFC 7902.5.10.1]
Store containers under 30-gallon capacity no more than 3 feet or two containers high, whichever is less unless an fixed shelving or otherwise satisfactorily secured. Do not stack containers over 30-gallon capacity. Store all containers in an upright position.
- ☐ HM.E2 Over 10 gallons of flammable liquids were stored outside of flammable storage lockers or rooms. [SFHC 1116; SFFC 7902.5.8, 7902.5.9]
Store opened containers of flammable liquids in flammable liquid cabinets. The cabinets must be labeled "FLAMMABLE--KEEP FIRE AWAY"; doors must be well fitted, self-closing, with latching device; the bottom must be liquid-tight to a height of 2 inches; and constructed according to SFFC requirements.
- ☐ HM.E3 Oily rags and other combustible materials were improperly stored. [SFHC 1116; SFFC 1103.2.1.3]
Store oily rags and other combustibles in metal or metal-lined receptacles equipped with tight-fitting covers when such materials are kept within a building or adjacent to a building
- ☐ HM.E4 Flammable liquids were stored in close proximity of ignition sources. [SFHC 1116; SFFC 7901.10, 7902.1.4]
Eliminate potential sources of ignition from areas where flammable liquids are stored or handled.
- ☐ HM.E5 Dispensing of flammable liquids were not provided with proper dispensing devices. [SFHC 1116; SFFC 7903.1.3.5]
Provide a method other than gravity for dispensing Class I flammable liquids. Examples include transferring from approved safety cans, through an approved closed piping system, from containers by an approved suction pump, etc.
- ☐ HM.E6 Containers used in transferring flammable liquids were not grounded. [SFHC 1116; SFFC 7901.10, 7903.1.4.1]
Provide a bond between the two containers, one of which shall be grounded, when transferring a flammable mixture from one container to another.

Spill Maintenance Requirements

- ☐ HM.F1 Spilled hazardous material was present in work, storage areas and/or secondary containment. [SFHC 1116; SFFC 8001.5; CCR 66262.34(a)(1)(A), 66264.175(b)(5), 66265.196(c)]
Remove spilled hazardous materials from floors and shelves immediately. Remove spilled hazardous materials from secondary containment within 24 hours of detection.
- ☐ HM.F2 Secondary containment was inadequate. [SFHC 1116; SFFC 8003.1.7.1]
Provide secondary containment in areas used for the storage of solid and liquid hazardous materials to control spillage and to contain or drain off spillage and fire protection water discharged in the storage area.

HM-4

White-bus/initial yellow-follow-up
pink-enforcement goldenrod-file

BUSINESS NUMBER

INSPECTOR NUMBER

<input type="checkbox"/> HM.F3	Spill containment equipment was inadequate. [SFHC 1116; SFEC 8001.5] <i>Provide equipment to handle large and small spills or leaks. Equipment should include absorbent, disposal containers, sealers, and personal protective equipment.</i>
Storage of Compressed Gases	
<input type="checkbox"/> HM.G1	Compressed gas cylinders were improperly stored. [SFHC 1116; SFEC 7401.5, 7401.6] <i>Store compressed gas cylinders in cool, ventilated, and secured areas with a label on each cylinder identifying its content.</i>
<input type="checkbox"/> HM.G2	Compressed gas cylinders were not secured. [SFHC 1116; SFEC 7401.6.4] <i>Secure all compressed gas cylinders that are in service or in storage to prevent from falling due to contact, vibration or seismic activity.</i>
<input type="checkbox"/> HM.G3	Compressed gas cylinders did not have their caps in place. [SFHC 1116; SFEC 7401.7] <i>Cap cylinder valves at all times unless the cylinders are connected to approved gas utilization equipment.</i>
Other Regulated HMUPA Programs	
<input type="checkbox"/> HM.H1	Unreported regulated substances were observed in amounts exceeding threshold planning quantities. [SFHC 1110 1(b)] <i>Submit a completed California Accidental Release Prevention Program Registration form.</i>
<input type="checkbox"/> HM.H2	The facility is subject to regulation as an Above Ground Storage facility because: at least one single container containing petroleum has a capacity greater than 660 gallons or the total petroleum storage capacity on site exceeds 1320 gallons. A Spill Prevention Control and Countermeasure plan (SPCC) was not present on site. [SFHC 1106, HSC 25270.5] <i>A completed SPCC must be submitted to the Regional Water Quality Control Board (RWQCB). Prepare and maintain a completed SPCC copy on site. A referral will be made to the RWQCB.</i>
Other	
<input type="checkbox"/> HM.I1	Other violations of Article 21, 21A or 22 of the SFHC:
<input type="checkbox"/> HM.I2	No violations of Article 21 or 21A of the SFHC were observed at time of inspection.
Referrals	
<input type="checkbox"/> HM.J1	Potential violations of other local, state, or federal laws and regulations were observed. A referral will be made to the appropriate agencies.
Recommendations:	
<input checked="" type="checkbox"/> HML.K1	<i>Recommend: modify hand sink to install eye wash device.</i>

INSPECTOR NUMBER

The following schedules are attached: ☐ UST ☐ HWG ☐ TP

Please be advised that inspections pursuant to the provisions of the Hazardous Materials Ordinance are not intended to take the place of other regulatory agency inspections. Additional violations of the laws and appropriate regulations enforced by those agencies may be present. You will be mailed an invoice for all outstanding fees and penalties. Abatement of this Notice of Violation does not address outstanding fees. Failure to correct violations and pay all penalties and fees due will result in further enforcement action being initiated against your business. You may be ordered to appear before the Director of Public Health and be assessed administrative civil penalties of up to two thousand dollars (\$2,000) per day per violation. You may also be liable for civil and criminal penalties. The amount of penalty assessed may be based on the number of days your business is not in compliance.

Signature of Recipient

Signature of Inspector

Inspector #

Post-Inspection Instructions for Operators:

- Correct the violations checked above and attached schedules by _____.
- Sign below. Your signature signifies that each violation has been corrected. Please be advised that failure to correct the violations will result in enforcement actions taken against your business. The Department of Public Health retains the right to conduct a site inspection to verify the correction of the violations.
- Within 35 days, send a copy of pages 1 through 6 of this Inspection Report/Notice of Violation and required materials to:

HMUPA, 1390 Market Street, Suite #210, San Francisco, CA 94102; Attention: 42 Leong

Stella -

Your safety meeting must also include that everyone received a copy of the business emergency response plan and that each employee read it and understands it. It is also good to have the employees sign in that they were present.

This required meeting is an annual training that is specifically held to refresh and train employees about the business' emergency response procedures & their safety.

Please revise your meeting agenda and notes accordingly. Thank you.

Violations of Article 21, San Francisco Health Code		
<input type="checkbox"/>	A	A complete application to store hazardous materials was not submitted. Submit a complete Registration Application and the Processing Fee within 30 days. (A \$340.00 late penalty fee and a \$170.00 site investigation fee has been assessed.) [SFHC 111(c), 1176]
<input type="checkbox"/>	B	Required Hazardous Materials management programs and records were not found on site. Keep on site accurate Hazardous Materials Reduction Plan, Hazardous Waste Reduction Plan, Emergency Response Plan, Material Safety Data Sheets, training records, and self-inspection records. [SFHC 1110.1(d)(e)(h), 1161(a); SFHC 80.106, 80.109]
<input type="checkbox"/>	C	Facility map was inadequate. Submit an amended facility map with information on the following: Hazardous materials/Acutely hazardous materials/Underground storage tank locations, utilities shutoffs, North direction arrow, building name, Front direction of site. [SFHC 1110.1(b)(5); SFHC 80.109, 80.301(k)]
<input type="checkbox"/>	D	Hazardous Materials Disclosure Form was incomplete. Submit a complete inventory of all hazardous materials stored over the reporting thresholds. [SFHC 1110.1(b); SFHC 80.103]
<input type="checkbox"/>	E	Emergency Response Plan for the site was inadequate. Submit an amended plan with information on the following: Immediate notification to appropriate local emergency rescue personnel; procedures for managing a release or threatened release to minimize any potential harm or damage to persons, property or the environment; evacuation plans and procedures, including immediate notice, for the business site and for the affected public; information on the availability, testing, and maintenance of emergency equipment. [SFHC 1110.1(c); SFHC 80.109]
<input type="checkbox"/>	F	Incompatible materials were not stored in a manner which will prevent accidental mixing. Separate or isolate materials which in combination with other substances may cause a fire or explosion or may liberate a flammable or poisonous gas. Separation can be achieved by: 1) Separating the storage of the incompatible hazardous materials by a distance of greater than 20 feet; 2) Isolate the storage of the incompatible materials by a non-combustible partition extending greater than 18 inches above and to the sides of the material; or 3) Store the incompatible materials in separate storage cabinets. [SFHC 1116; SFHC 80.301(a),(n)]

<input checked="" type="checkbox"/>	G	<p>Hazardous materials storage containers were not properly labeled. Label each container of hazardous materials with the identity of the hazardous materials and appropriate hazard warnings.</p> <p>Label each container of hazardous waste with the following: 1) The words "Hazardous Waste", 2) Composition and physical state, 3) Hazard property, 4) Name and address of generator, 5) Accumulation start date. [SFHC 1117; SFFC 80.301(d)]</p> <p><i>For example, drums without labels need proper labeling that identify the materials being stored such as Flux & wood scraps.</i></p>
<input type="checkbox"/>	H	<p>Hazard identification signs were inadequate. Provide appropriate hazard warning signs. [SFHC 1116; SFFC 80.107]</p>
<input checked="" type="checkbox"/>	I1	<p>Hazardous materials containers were defective. Repair or dispose of defective containers in an approved manner. [SFHC 1116; SFFC 80.301(b)]</p> <p><i>For example, dispose of hazardous materials in an appropriate manner located in the maintenance area.</i></p>
<input checked="" type="checkbox"/>	I2	<p>Empty hazardous materials storage containers were improperly stored. Empty containers previously used for storage of hazardous materials must be free from residual material or vapor or must be maintained as specified for the storage of the hazardous material. Label all empty containers as <i>Empty</i>. [SFHC 1116; SFFC 79.201(c), 80.301(b)]</p> <p><i>For example, Empty drums located on the shelves need a proper sign reading EMPTY and cylinder needs a sign as EMPTY.</i></p>
<input type="checkbox"/>	I3	<p>Containers were left open when not in use. Caps, bung, or other sealing devices shall be in place on hazardous materials/waste containers whenever possible. [SFHC 1116]</p>
<input type="checkbox"/>	I4	<p>Hazardous materials containers were improperly stacked and stored. Store containers under 30-gallon capacity no more than 3 feet or two containers high, whichever is less unless on fixed shelving or otherwise satisfactorily secured. Do not stack containers over 30-gallon capacity. Store all containers in an upright position. [SFHC 1116; SFFC 79.202]</p>
<input type="checkbox"/>	J1	<p>Oily rags and other combustible materials were improperly stored. When such materials are kept within a building or adjacent to a building, store them in metal or metal-lined receptacles equipped with tight-fitting covers or in rooms or vaults constructed of noncombustible materials. [SFHC 1116; SFFC 11.302(a)]</p>
<input type="checkbox"/>	J2	<p>Spilled hazardous material was present in work and/or storage areas. Remove spilled materials from floors or shelves. [SFHC 1116; SFFC 80.105(c)]</p>

<input type="checkbox"/>	K	Over 10 gallons of flammable liquids were stored outside of flammable storage lockers or rooms. Store opened containers of flammable liquids in flammable liquid cabinets. The cabinets must be labeled <i>Flammable—Keep Fire Away</i> ; doors must be well fitted, self-closing, with latching device; the bottom must be liquid-tight to a height of 2 inches; and constructed according to SFHC requirements. [SFHC 1116; SFFC 79.202]
<input type="checkbox"/>	L	Shelves on which hazardous materials were stored were not of substantial construction and/or were not adequately braced. Provide shelves with a lip or guard when used for the storage of individual containers. [SFHC 1116; SFFC 80.301(I)]
<input type="checkbox"/>	M1	Compressed gas cylinders were improperly stored. Store compressed gas cylinders in cool, ventilated, and secured areas with a label on each cylinder identifying its content. [SFHC 1116; SFFC 74.104]
<input checked="" type="checkbox"/>	M2	Compressed gas cylinders were not secured. Secure all compressed gas cylinders that are in service or in storage to prevent falling or being knocked over. [SFHC 1116; SFFC 74.107(a)] <i>For example, the Propane cylinder located in the maintenance area.</i>
<input type="checkbox"/>	M3	Compressed gas cylinders did not have their caps in place. Cap all cylinder valves at all times unless the cylinders are connected to approved gas utilization equipment. [SFHC 1116; SFFC 74.105(a)]
<input type="checkbox"/>	N	Equipment to contain spillage was inadequate. Provide containment in areas used for the storage of solid and liquid hazardous materials to control spillage and to contain or drain off spillage and fire protection water discharged in the storage area. [SFHC 1116; SFFC 80.301(I)]
<input type="checkbox"/>	O1	Flammable liquids were stored in close proximity of ignition sources. Eliminate the potential sources of ignition from areas where flammable liquids are stored or handled. [SFHC 1116; SFFC 79.114]
<input type="checkbox"/>	O2	Dispensing of flammable liquids were not provided with proper dispensing devices. Provide a method other than gravity for dispensing flammable liquids. [SFHC 1116; SFFC 79.802(c)]
<input type="checkbox"/>	O3	Containers used in transferring flammable liquids were not grounded. When a flammable mixture is transferred from one portable container to another, provide a bond between the two containers one of which shall be grounded. [SFHC 1116; SFFC 79.802(e), 45.208(h)]
<input checked="" type="checkbox"/>	P1	Access to electrical control panels was inadequate. Provide a minimum clearance width of 30 inches and a minimum height of 78 inches. [SFHC 1116; SFFC 85.109(b)] <i>For example, the floor space needs to be cleared below the electrical panel.</i>

<input type="checkbox"/>	P2	Doors to electrical control panel rooms were unmarked. Mark entrances with a plainly visible and legible sign stating ELECTRICAL ROOM or similar pre-approved wording. [SFHC 1116; SFPC 85.109(c)]
<input type="checkbox"/>	Q	Fire extinguishers were improperly managed. Install, mount, and maintain on an annual basis all portable fire extinguishers. [SFHC 1116; SFPC 10.505]
<input checked="" type="checkbox"/> V	R	Spill containment equipment was inadequate. Provide equipment to handle large and small spills or leaks. Equipment should include absorbent, disposal containers, sealers, and personal protective equipment. [SFHC 1116; SFPC 80.105(c)] <i>For example, provide complete spill kit at the maintenance area.</i>
<input type="checkbox"/>	S	Other violations of Article 21, S.F.H.C.:
<input type="checkbox"/>	T	Potential violations of other local, state, or federal laws and regulations were observed. A referral will be made to the appropriate agencies.

Please be advised that inspections pursuant to the provisions of the Hazardous Materials Ordinance are not intended to take the place of other regulatory agency inspections. Additional violations of the law and appropriate regulations enforced by those agencies may be present. You will be mailed an invoice for all outstanding fees and penalties. Failure to correct violations and pay all penalties and fees due will result in further enforcement action being initiated against your business. You may be ordered to appear before the Director of Public Health and be assessed administrative civil penalties. Penalties up to two thousand dollars (\$2,000) per day per violation may be levied. The amount of penalty assessed may be based on the number of days your business is not in compliance.

HMUPA COMPLIANCE CERTIFICATE

FOR THE FOLLOWING PROGRAM ELEMENTS

Hazardous Materials Storage Certificate of Registration for 52 liquid gallons, 3490 solid pounds, and 255 cubic feet compressed gas

Does not generate any Hazardous Waate

Does not treat Hazardous Waate

Does not operate any Underground Storage Tanks

Is not a Regulated Substance Facility

Does not store hazardous materials in Aboveground Storage Tanks

Valid November 1, 2001 to November 1, 2002
in accordance with the provisions of San Francisco Health Code, Part II, Chapter V, Articles 21, 21A, and 22

Reservations/Supplements:

1. Change of ownership must be reported to the Department of Public Health. This Compliance Certificate is not transferable.
2. The Department of Public Health must be notified immediately of any changes to the inventory, map, emergency response plan, or other application information.
3. In issuing this Certificate, the Department of Public Health reserves the right to enter the premises and require the business to comply with the full requirements of the San Francisco Hazardous Materials Ordinance, including reimbursement to the City for extraordinary costs resulting from releases and/or noncompliance.
4. The business named above shall handle all regulated hazardous materials and hazardous waste in conformity with the San Francisco Building Code, Electric Code, Public Works Code, Fire Code, City Planning Code and other laws governing the use and storage of hazardous materials.
5. All HMUPA fees are due and payable upon receipt of an invoice.

Sue Cone, Program Manager

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY COMPLIANCE CERTIFICATE AMENDMENTS AND CONDITIONS

VIOLATION(S) OF THE AMENDMENTS OR CONDITIONS BELOW SHALL INVALIDATE THIS HMUPA COMPLIANCE CERTIFICATE.

1. Failure to notify the Department of Public Health, Hazardous Materials Unified Program Agency of an unauthorized release within twenty-four (24) hours. Call (415) 252-3900 to report all spills and leaks.
2. Failure to report business information changes to the application and/or operational changes to the business including chemical inventory amounts. All revised document(s) must be submitted to the Department of Public Health (DPH) within thirty (30) days.
3. Failure to pay HMUPA fees and penalties when due and payable.

Hazardous Materials Certificate of Registration Required:

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMUPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank Operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 and 6.75 of the CA Health and Safety Code and their regulations.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, ventose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMUPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring program and response plan(s) on file with the Department of Public Health. A copy of the monitoring plan, plot plan, and response plan shall be maintained on site. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of issuance may be specified.

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY COMPLIANCE CERTIFICATE AMENDMENTS AND CONDITIONS

VIOLATION(S) OF THE AMENDMENTS OR CONDITIONS BELOW SHALL INVALIDATE THIS HMLPA COMPLIANCE CERTIFICATE

1. Failure to notify the Department of Public Health, Hazardous Materials Unified Program Agency of an unauthorized release within twenty-four (24) hours. Call (415) 252-3900 to report all spills and leaks.
2. Failure to report business information changes to the application and/or operational changes to the business including chemical inventory amounts. All revised document(s) must be submitted to the Department of Public Health (DPH) within thirty (30) days.
3. Failure to pay HMLPA fees and penalties when due and payable.

Hazardous Materials Certificate of Registration Required:

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMLPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank Operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 and 6.75 of the CA Health and Safety Code and their regulations.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, vadose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMLPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring program and response plan(s) on file with the Department of Public Health. A copy of the monitoring plan, plot plan, and response plan shall be maintained on site. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of Issuance may be specified.

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMUPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 of the CA Health and Safety Code.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, vadose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMUPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring plan(s) on file with the Department of Public Health. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of issuance may be specified.

INSTRUCTIONS FOR THIS FORM -- Please review the information on file with the Department of Public Health about your business in statements 1 through 8 below. Then for each statement indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column.

For each check (✓) in the NO column, you must submit additional forms to document your changes. The enclosed Application Invoice & Fee Calculation Form reflects fees in accordance with the information indicated below.

If you checked NO indicate the correct amount or information:

		YES	NO	Corrected Information:
1. Our records indicate that this business generates hazardous waste in the following quantity	None Tons per Yr	X		Tons per Yr
2.1 Our records indicate that this business has the following number of hazardous waste treatment units regulated under Permit By Rule:	0	X		
2.2 Our records indicate that this business has the following number of Conditionally Authorized hazardous waste treatment units:	0	X		
2.3. Our records indicate that this business has the following number of Conditionally Exempt hazardous waste treatment units:	0	X		
3.1. Our records indicate that this business is registered to store liquid hazardous materials in the following amount:	52 Gallons	X		Gallons
3.2 Our records indicate that this business is registered to store solid hazardous materials in the following amount:	3490 Pounds	X		Pounds
3.3 Our records indicate that this business is registered to store compressed gas hazardous materials in the following amount:	255 Cubic Feet	X		Cubic Feet
If you are required to maintain a Hazardous Materials Certificate of Registration, (See Questions 3.1 through 3.3 above), please read AND INITIAL the following statement: The Hazardous Materials Inventory, Map and Emergency Response and Training Plans most recently submitted to HMUPA are complete, accurate and up to date. There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory. No hazardous materials subject to inventory requirements are being handled that are not listed on the most recently submitted inventory. (initial): (This is a STATE requirement.)				
4. Our records indicate that this business owns/operates the following number of underground storage tanks:	0	X		
5. Our records indicate that this business has the following Regulated Substances Program designation (formerly acutely hazardous materials):	None	X		
6. Our records indicate that this is an above ground petroleum storage tank facility:	No	X		
7. Our records indicate that this business operates a mobile air conditioning chlorofluorocarbon recycling system.	No	X		
8. Our records indicate that this business owns/operates one or more diesel back-up generators:	No	X		

I certify under penalty of perjury that the information provided on this form and other documents included in this application is complete and accurate to the best of my knowledge. I understand that disclosure of incorrect information or submission of required documents after my application due date will result in late fees and penalties.

HMUPA COMPLIANCE CERTIFICATE
FOR THE FOLLOWING PROGRAM ELEMENTS

Hazardous Materials Storage Certificate of Registration for 52 liquid gallons, 3490 solid pounds, and 255 cubic feet compressed gas

Does not generate any Hazardous Waste

Does not treat Hazardous Waste

Does not operate any Underground Storage Tanks

Is not a Regulated Substance Facility

Does not store hazardous materials in Aboveground Storage Tanks

Valid November 1, 2002 to November 1, 2003
in accordance with the provisions of San Francisco Health Code, Part II, Chapter V, Articles 21, 21A, and 22

Restrictions/Stipulations:

1. Change of ownership must be reported to the Department of Public Health. This Compliance Certificate is not transferable.
2. The Department of Public Health must be notified immediately of any changes to the inventory, map, emergency response plan, or other application information.
3. In issuing this Certificate, the Department of Public Health reserves the right to enter the premises and require the business to comply with the full requirements of the San Francisco Hazardous Materials Ordinance, including reimbursement to the City for extraordinary costs resulting from releases and/or noncompliance.
4. The business named above shall handle all regulated hazardous materials and hazardous waste in conformity with the San Francisco Building Code, Electric Code, Public Works Code, Fire Code, City Planning Code and other laws governing the use and storage of hazardous materials.
5. All HMUPA fees are due and payable upon receipt of an invoice.

Sue Cone, Program Manager

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY COMPLIANCE CERTIFICATE AMENDMENTS AND CONDITIONS

VIOLATION(S) OF THE AMENDMENTS OR CONDITIONS BELOW SHALL INVALIDATE THIS HMUPA COMPLIANCE CERTIFICATE.

1. Failure to notify the Department of Public Health, Hazardous Materials Unified Program Agency of an unauthorized release within twenty-four (24) hours. Call (415) 252-3900 to report all spills and leaks.
2. Failure to report business information changes to the application and/or operational changes to the business including chemical inventory amounts. All revised document(s) must be submitted to the Department of Public Health (DPH) within thirty (30) days.
3. Failure to pay HMUPA fees and penalties when due and payable.

Hazardous Materials Certificate of Registration Required:

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMUPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 and 6.75 of the CA Health and Safety Code and their regulations.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, vadose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMUPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring program and response plan(s) on file with the Department of Public Health. A copy of the monitoring plan, plot plan, and response plan shall be maintained on site. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of issuance may be specified.

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY COMPLIANCE CERTIFICATE AMENDMENTS AND CONDITIONS

VIOLATION(S) OF THE AMENDMENTS OR CONDITIONS BELOW SHALL INVALIDATE THIS HMUPA COMPLIANCE CERTIFICATE.

1. Failure to notify the Department of Public Health, Hazardous Materials Unified Program Agency of an unauthorized release within twenty-four (24) hours. Call (415) 252-3900 to report all spills and leaks.
2. Failure to report business information changes to the application and/or operational changes to the business including chemical inventory amounts. All revised document(s) must be submitted to the Department of Public Health (DPH) within thirty (30) days.
3. Failure to pay HMUPA fees and penalties when due and payable.

Hazardous Materials Certificate of Registration Required:

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMUPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 and 6.75 of the CA Health and Safety Code and their regulations.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, vadose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMUPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring program and response plan(s) on file with the Department of Public Health. A copy of the monitoring plan, plot plan, and response plan shall be maintained on site. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of issuance may be specified.

<input type="checkbox"/> Application Response (705)	<input type="checkbox"/> UST Only (708)	<input type="checkbox"/> Other (740)

This inspection report identifies violations (if any) of federal, state or local laws and regulations governing hazardous materials and hazardous waste. The applicable laws and regulations are found in the Health and Safety Code (HSC), Division 20, Chapter 6.5, 6.7, 6.75 and 6.95, Titles 19, 22, 23 and 27 of the California Code of Regulations (CCR), and the San Francisco Fire Code (SFFC). Articles 21, 21A and 22 of the San Francisco Health and Safety Code (SFHC) are the implementing ordinances.

This business is regulated under the following Unified Program elements:

- ☒ Hazardous Materials
- ☐ Hazardous Waste Generator (EPA ID NO)
- ☐ Hazardous Waste Treatment
- ☐ Underground Storage Tanks
- ☐ Regulated Substances (Cal ARP)

DATE 7-15-01

The following Violation Detail Pages are attached: **A B C D E F G H I J K L**

Specific instances of violations identified are listed on each Violation Detail Page. For hazardous materials and waste violations (Detail Pages A through D), refer to the Notice of Violation Supplement to determine the exact nature of each violation cited and the steps needed to achieve compliance. For Underground Storage Tank violations (Detail Pages E through H) and Regulated Substance violations (Detail Pages I through L) refer to the back of each Violation Detail Page for this information. Please be advised that inspections pursuant to the Hazardous Materials and Waste Ordinances are not intended to take the place of other regulatory agency inspections. Additional violations of the laws and regulations enforced by other agencies may be present. You will be mailed an invoice for all outstanding fees and penalties. Failure to correct violations and pay all outstanding fees will result in further enforcement action against your business. You may be assessed administrative civil penalties of up to five thousand dollars (\$5,000) per day per violation as well as civil and criminal penalties. The amount of penalty assessed is based on the number of days your business is out of compliance. You have the right to appeal violations cited in this Notice of Violation. Requests for appeal must be made in writing within 15 days of the issuance date of this NOV. Appeals are heard during a public hearing before the Director of Health.

INSTRUCTIONS FOR THIS FORM – Please review the information on file with the Department of Public Health about your business in statements 1 through 8 below. Then for each statement, indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column.

For each check (✓) in the NO column, you must submit additional forms to document your changes. The enclosed Application Invoice & Fee Calculation Form reflects fees in accordance with the information indicated below.

If you checked NO indicate the correct amount or information		
YES	NO	Corrected Information:

1. Our records indicate that this business generates hazardous waste in the following quantity	None Tons per Yr	✓		
2.1 Our records indicate that this business has the following number of hazardous waste treatment units regulated under Permit By Rule:	0	✓		
2.2 Our records indicate that this business has the following number of Conditionally Authorized hazardous waste treatment units:	0	✓		
2.3. Our records indicate that this business has the following number of Conditionally Exempt hazardous waste treatment units:	0	✓		
3.1. Our records indicate that this business is registered to store liquid hazardous materials in the following amount:	52 Gallons	✓		Gallons
3.2 Our records indicate that this business is registered to store solid hazardous materials in the following amount:	3490 Pounds	✓		Pounds
3.3 Our records indicate that this business is registered to store compressed gas hazardous materials in the following amount:	255 Cubic Feet	✓		Cubic Feet
If you are required to maintain a Hazardous Materials Certificate of Registration, (See Questions 3.1 through 3.3 above), please read AND INITIAL the following statement: The Hazardous Materials Inventory, Map and Emergency Response and Training Plans most recently submitted to HMUPA are complete, accurate and up to date. There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory. No hazardous materials subject to inventory requirements are being handled that are not listed on the most recently submitted inventory. (Initial): (This is a STATE requirement)				
4. Our records indicate that this business owns/operates the following number of underground storage tanks:	0	✓		
5. Our records indicate that this business has the following Regulated Substances Program designation (formerly acutely hazardous materials):	None	✓		
6. Our records indicate that this is an above ground petroleum storage tank facility:	No	✓		
7. Our records indicate that this business operates a mobile air conditioning chlorofluorocarbon recycling system	No	✓		
8. Our records indicate that this business owns/operates one or more diesel back-up generators:	No	✓		

I certify under penalty of perjury that the information provided on this form and other documents included in this application is complete and accurate to the best of my knowledge. I understand that disclosure of incorrect information or submission of required documents after my application due date will result in late fees and penalties.

☐ Although violations were found during this inspection, Violation Detail pages were not left. Appropriate Violation Detail Pages will be mailed within 60 days of today's inspection.

The following Violation Detail Pages are attached: **A B C D E F G H I J K L M N O P**

Specific instances of violations identified are listed on each Violation Detail Page. For hazardous materials and waste violations (Detail Pages A through D), refer to the Notice of Violation Supplement to determine the exact nature of each violation cited and the steps needed to achieve compliance. For all other program elements, refer to the back of each Violation Detail Page for this information. Please be advised that inspections by Department of Public Health staff are not intended to take the place of other regulatory agency inspections. Additional violations of laws and regulations enforced by other agencies may be present. You will be mailed an invoice for all outstanding fees and penalties (if any). Failure to correct violations and pay all outstanding fees will result in further enforcement action against your business. You may be assessed administrative civil penalties of up to five thousand dollars (\$5,000) per day per violation as well as civil and criminal penalties. The amount of penalty assessed is based on the number of days your business is out of compliance.

HMUPA COMPLIANCE CERTIFICATE

FOR THE FOLLOWING PROGRAM ELEMENTS

Hazardous Materials Storage Certificate of Registration for 52 liquid gallons, 3490 solid pounds, and 255 cubic feet compressed gas

Does not generate any Hazardous Waste

Does not treat Hazardous Waste

Does not operate any Underground Storage Tanks

Is not a Regulated Substance Facility

Does not store hazardous materials in Aboveground Storage Tanks

Does not operate any Backup Diesel Generator

Does not conduct CFC Recycling on Site

Valid November 1, 2003 to November 1, 2004

In accordance with the provisions of San Francisco Health Code, Part II, Chapter V, Articles 21, 21A, and 22

Restrictions/Stipulations:

1. Change of ownership must be reported to the Department of Public Health. This Compliance Certificate is not transferable.
2. The Department of Public Health must be notified immediately of any changes to the inventory, map, emergency response plan, or other application information.
3. In issuing this Certificate, the Department of Public Health reserves the right to enter the premises and require the business to comply with the full requirements of the San Francisco Hazardous Materials Ordinance, including reimbursement to the City for extraordinary costs resulting from releases and/or noncompliance.
4. The business named above shall handle all regulated hazardous materials and hazardous waste in conformity with the San Francisco Building Code, Electric Code, Public Works Code, Fire Code, City Planning Code and other laws governing the use and storage of hazardous materials.
5. All HMUPA fees are due and payable upon receipt of an invoice.

Sue Cone

Sue Cone, Program Manager

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY COMPLIANCE CERTIFICATE AMENDMENTS AND CONDITIONS

VIOLATION(S) OF THE AMENDMENTS OR CONDITIONS BELOW SHALL INVALIDATE THIS HMUPA COMPLIANCE CERTIFICATE.

1. Failure to notify the Department of Public Health, Hazardous Materials Unified Program Agency of an unauthorized release within twenty-four (24) hours. Call (415) 252-3900 to report all spills and leaks.
2. Failure to report business information changes to the application and/or operational changes to the business including chemical inventory amounts. All revised document(s) must be submitted to the Department of Public Health (DPH) within thirty (30) days.
3. Failure to pay HMUPA fees and penalties when due and payable.

Hazardous Materials Certificate of Registration Required:

(a) Any person who handles, sells, stores, or uses hazardous materials in quantities over the thresholds as listed in Article 21 of the SFHC shall obtain and keep a current Hazardous Materials Certificate. The Certificate issued for that single establishment shall include all of the storage areas located on the premises. (b) A HMUPA-regulated business shall obtain additional approvals prior to construction, for any storage facility thereafter connected, installed, constructed, repaired, substantially modified, replaced, closed or removed. (c) Notification is required prior to any substantial revision to the existing hazardous materials inventory stored on the premises which would result in a dramatic quantity change as indicated on the Certificate. A registered business shall file an addendum within ten (10) working days from the date of receipt of any new hazardous material inventory or quantity reduction of present inventory disclosed.

Permit By Rule or Grant of Authorization to Treat Hazardous Waste Required:

No owner or operator of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site shall accept, treat, store or dispose of a hazardous waste at the facility, area, or site, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization.

Conditions of issuance may be specified.

Underground Storage Tank Operating Permit Required:

All operators of underground storage tanks are required to maintain a valid Tank operating Permit for each underground storage tank. The Tank Operating Permit is valid as long as the following conditions are met:

- USTs must be operated in conformance with Chapter 6.7 and 6.75 of the CA Health and Safety Code and their regulations.
- Yearly maintenance testing of all equipment including meters, pipeline leak detectors, emergency shutoff valves, vadose zone or ground water monitoring, or annular space monitors, where applicable is required.
- Prior Approval to perform modifications of the underground storage tanks, i.e. pipeline require, new tank installation, tanks up grading, tank lining, etc. must be obtained from the HMUPA, the San Francisco Fire Department, and the Department of Public Works.
- USTs must be monitored for leaks according to the monitoring program and response plan(s) on file with the Department of Public Health. A copy of the monitoring plan, plot plan, and response plan shall be maintained on site. Written records of monitoring performed must be maintained for period of three (3) years. If the records are located offsite, the records shall be made available for inspection within thirty-six (36) hours.

Other Conditions of issuance may be specified.

Chlorofluorocarbon Recovery and Recycling Permit Required:

Any Person that installs, repairs, dismantles or disposes of motor vehicle air-conditioning systems is required to obtain a permit as specified in Article 24 of the San Francisco Health Code.

Diesel Backup Generator Certificate Required:

Any Person that owns or operates a Diesel Backup Generator is required to obtain a Certificate as specified in Article 30 of the San Francisco Health Code.

HAZARDOUS MATERIALS UNIFIED PROGRAM AGENCY (HMUPA)**BUSINESS ACTIVITIES DECLARATION FORM**

Facility ID # 5600	Packet Due Date 10/15/2003
Business Name ROTO METALS	
Street Address 980 Harrison ST	
San Francisco, CA	Zip Code 94107

INSTRUCTIONS FOR THIS FORM -- Please review the information on file with the Department of Public Health about your business in statements 1 through 8 below. Then for each statement, indicate if the information is correct by placing a check (✓) in the YES column or incorrect by placing a check (✓) in the NO column.

For each check (✓) in the NO column, you must submit additional forms to document your changes. The enclosed Application Invoice & Fee Calculation Form reflects fees in accordance with the information indicated below.

If you checked NO indicate the correct amount or information.

		YES	NO	Corrected Information:
1. Our records indicate that this business generates hazardous waste in the following quantity:	None Tons per Yr	X		Tons per Yr
2.1 Our records indicate that this business has the following number of hazardous waste treatment units regulated under Permit By Rule:	0	X		
2.2 Our records indicate that this business has the following number of Conditionally Authorized hazardous waste treatment units:	0	X		
2.3. Our records indicate that this business has the following number of Conditionally Exempt hazardous waste treatment units:	0	X		
3.1. Our records indicate that this business is registered to store liquid hazardous materials in the following amount:	52 Gallons	X		Gallons
3.2 Our records indicate that this business is registered to store solid hazardous materials in the following amount:	3490 Pounds	X		Pounds
3.3 Our records indicate that this business is registered to store compressed gas hazardous materials in the following amount:	255 Cubic Feet	X		Cubic Feet
<p>If you are required to maintain a Hazardous Materials Certificate of Registration, (See Questions 3.1 through 3.3 above), please read AND INITIAL the following statement: The Hazardous Materials Inventory, Map and Emergency Response and Training Plans most recently submitted to HMUPA are complete, accurate and up to date. There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory. No hazardous materials subject to inventory requirements are being handled that are not listed on the most recently submitted inventory. (initial): (This is a STATE requirement.)</p>				
4. Our records indicate that this business owns/operates the following number of underground storage tanks:	0	X		
5. Our records indicate that this business has the following Regulated Substances Program designation (formerly acutely hazardous materials):	None	X		
6. Our records indicate that this is an above ground petroleum storage tank facility:	No	X		
7. Our records indicate that this business operates a mobile air conditioning chlorofluorocarbon recycling system.	No	X		
8. Our records indicate that this business owns/operates one or more diesel back-up generators:	No	X		

I certify under penalty of perjury that the information provided on this form and other documents included in this application is complete and accurate to the best of my knowledge. I understand that disclosure of incorrect information or submission of required documents after my application due date will result in late fees and penalties.

Vesting Description: COMPANY OR CORPORATION	
Legal Description	
Produced by 112000	
County:	
Legal Description:	
No Deed Records Found	
Source Information	
Real Property Ownership is from the county assessor office and is updated annually. Deed Transfers are from the county recorder office and may be more current than the assessor data. To determine current ownership, review the transactions and dates in both sections of the Detail.	
If any fields are blank, this indicates the source did not supply that information for this property.	

Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is
